

Wireless IoT tomorrow Takes Off in Wiesbaden on Oct 19th & 20th

WIRELESS IOT
TOMORROW
2022

On 4,600 square meters more than 80 exhibitors show how the digital world of tomorrow will look like!

On October 19th and 20th, the gates of the RheinMain CongressCenter in Wiesbaden near Frankfurt Airport in Germany will open for visitors of the Wireless IoT tomorrow 2022.

Europe's largest wireless IoT trade show for end users, manufacturers, integrators and IT specialists scores with demo points, workshops, live demonstrations and innovative exhibitors. The trade fair is complemented by more than 30 lectures in the congress format. Every trade fair visitor can attend the lectures free of charge.

Without wireless IoT, the world of today and tomorrow is not digital!

Wireless IoT tomorrow 2022 focuses 100 percent on wireless IoT. The technologies RFID, NFC, BLE, UWB, RTLS, WiFi, 5G, wireless sensor technology, AI, robotics, OPC UA and LPWAN (LoRaWAN) are part of the digital world. Application areas include smart city, retail & consumer IoT, healthcare & security, industry 4.0 & maintenance, automotive and logistics & supply chain.

Live presentations in the conference program

More than 30 presentations will complement the trade show. Competence, innovation, research results and practical experience are the basis of the presentations. Latest user reports and best practice in dealing with wireless IoT technology are the focus. These include, for example, the use of RFID for eHealth, automation in production and logistics, authentication solutions for smart cities, condition monitoring with wireless sensors, sustainable supply chains, practical tips for RFID tagging in the automotive industry and much more.

„How is intelligent inventory management achieved with over 99 percent accuracy? What opportunities do wireless IoT technologies offer for monitoring cold chains? How can wireless technologies strengthen customer loyalty? How does the supply chain become transparent and sources of error shut down?“ are questions that will be answered at the forum.

Finding solutions on the way to digitalization and Industry 4.0

Personal contact is the main attraction of Wireless IoT tomorrow 2022. Exchanging ideas with IoT experts and future technology partners moves projects forward. By participating, visitors lay the foundation for their personal digitization strategy or build on existing projects.

Mark October 19th & 20th in your calendars, because the next wave of digitization is coming! [Click here to get your ticket.](#)

About the Wireless IoT tomorrow

The Wireless IoT tomorrow is Europe's largest trade show for Wireless IoT Technologies. The event has been organized yearly since 2011. It focuses on newest products, use cases, research findings and best practice with the technologies RFID, NFC, BLE, 4G & 5G, sensors, AI, robotics, OPC UA and LoRaWAN. A conference with over 30 live lectures is an essential part of the fair. In 2022, the tomorrow is held in the RheinMain CongressCenter in Wiesbaden on the 19th and 20th of October. Over 80 exhibitors will be present.
